

### National Framework for TB/HIV Collaborative Activities: Performance Indicators and Targets for TB/HIV Collaborative Activities

Performance Indicator	Data Source	2009	2010	2011	2012	2013	2014
<b>Cumulative Number of States/UT implementing intensified TB/HIV package (by end of each year)</b>	NACO/RNTCP TWG ‡	12	18	28	35	35	35
<b>State and district-level coordination</b>							
a. Proportion of TBHIV SCC/TWG meetings held at state level over past 4 quarters	RNTCP State PMR Qtrly Report	100%	100%	100%	100%	100%	100%
b. Proportion of Districts with at least 2 DCC Meetings over past 4 quarters	RNTCP District PMR Qtrly Report	>80%	>90%	>90%	>90%	>90%	>90%
<b>Intensified Case Finding (reported separately for ICTC and for ART centres)</b>							
a. Proportion of ICTC/ART center reporting on TB/HIV ICF activities *	NACO MIS	80%	>90%	>90%	>90%	>90%	>90%
b. Number of ICTC/ART clients referred to DMC as TB suspect	NACO MIS	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers
c. Number of (b) who are diagnosed with TB	NACO MIS	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers
d. Among (c), number/percentage of diagnosed TB patients put on DOTS	NACO MIS	>80%	>80%	>80%	>80%	>80%	>80%
<b>Detection of HIV in TB patients, &amp; HIV treatment</b>							
a. Number of TB patients HIV-tested by NACP	NACO MIS	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers	Increasing trend in numbers
b. Number/percentage of registered TB patients with known HIV status	RNTCP CF Qtrly Rpts†	353,000 50%	460,000 50%	660,000 50%	900,000 60%	1,050,000 70%	1,200,000 80%
c. Number of registered TB patients found to be HIV-positive	RNTCP CF Qtrly Rpts†	21,700	25,400	29,700	37,700	44,000	50,300
d. Number/percentage of HIV-positive TB patients receiving CPT during TB treatment ‡	RNTCP RT Qtrly Rpts†	n/a	60%	70%	80%	80%	80%
e. Number/percentage of HIV-positive TB patients receiving ART during TB treatment ‡	RNTCP RT Qtrly Rpts†	n/a	50%	60%	70%	70%	70%

\* "yes" if reports received for past 6 mo. ‡ For previous year's TB patient cohort. † For settings implementing the 'Intensified TB/HIV Package' only; annual target numbers reflect scale-up plan for the intensified package, 2008 TB notifications, and state-wise estimated prevalence of HIV among TB patients.
